Request for Research Use of Data v2017-05
Foldit Player Solution and Gameplay Data

Requester Information
Principal Investigator
Name: Gary Lupyan
Title: Associate Professor
Department: Department of Psychology
Email: lupyan@wisc.edu
Address: 1202 W. Johnson St., Madison, WI 53706-1611
Phone: (608) 262-4333

Study coordinator (if not PI)
Name: Pierce Edmiston
Title: Graduate student
Department: Department of Psychology
Email: pedmiston@wisc.edu
Address: 1202 W. Johnson St., Madison, WI 53706-1611
Phone: (507) 993-5778

Data Access
Desired username for any accounts to access data: pierce
IP addresses for whitelist to access data: 192.241.128.175, 128.104.130.116

Project Information
Description of purpose of project: This project will investigate the impact of inheritance on problem solving ability by comparing the performance of FoldIt players working together in teams to the performance of FoldIt players working alone. The goal of this investigation is to uncover the cost/benefit tradeoffs involved in sharing partial solutions to problems among groups of problem solvers in open-ended problem solving contexts. This research has the potential to improve the efficiency of FoldIt players and teams by identifying optimal ways of structuring teamwork.

Agreement
- I acknowledge that the quality and completeness of data cannot be guaranteed, and that I will use these data at my own risk.
- I will not further further disseminate the data to other groups or make it publicly available.
- If data I receive are identified with a code, I will not request access to the master list linking the codes with any identifying information or attempt to derive it.
- I will respect the project's terms of service and consent (found at http://fold.it/portal/legal), including sections relating to ownership of discoveries.
- For any publications resulting from the data, I will coordinate with the project to ensure proper citation.
